

By Vantage Labs

Vantage Labs has incubated products with new ideas in Big Data Cognitive Computing, Natural Language Understanding, Learning and Collaboration since 1990.

Vantage Labs develops powerful solutions that make teaching and learning more enjoyable and effective. Our products and professional services include the iseek App for Canvas, which is a Cognitive platform that consumes, unifies and organizes educational content for K-12, Higher Education, and professional degree programs.

iseek solves BIG DATA better, faster and at less cost

- Harness your data and gain control, continuity, and visibility within your curriculum.
- Aggregate data seamlessly from disparate sources within Canvas LMS as well as proprietary and public databases.
- View daily updates of new and expanded courses with automatic indexing.
- Prove where, when, how, and by whom every subject was taught, and how students performed against that teaching.
- Demonstrate efficacy for Best in Class Curriculum and KNOW your content is aligned to your standards.
- Discover topic coverage gaps and redundancies in slide decks, handouts, video lectures, and authoritative resources.

Know that all your content is aligned and efficacy proven

Features

- **Search**
iseek is a Cognitive Computing platform that leverages our patented Natural Language Understanding (NLU) technology. **iseek** consumes, unifies and organizes educational content, of any media type, across your sources. Query results direct a user to an exact slide, page or time stamp of a video.
- **Dashboards and Analytics**
Gain deeper insight into all your data with custom dashboards that provide data transparency for administrative, classroom and individual student levels. **iseek** illuminates where, when, how and by whom every subject was taught. It also shows how students perform against a particular topic, objective, or competency proving efficacy through student performance.
- **Best in Class Curriculum**
iseek introduces structure and continuity within your curriculum by aggregating and aligning information from teacher created, OER, and publisher resources. This includes information and resources sourced from within Canvas, proprietary databases, and authoritative public sources.

How does search work with **iseek**?

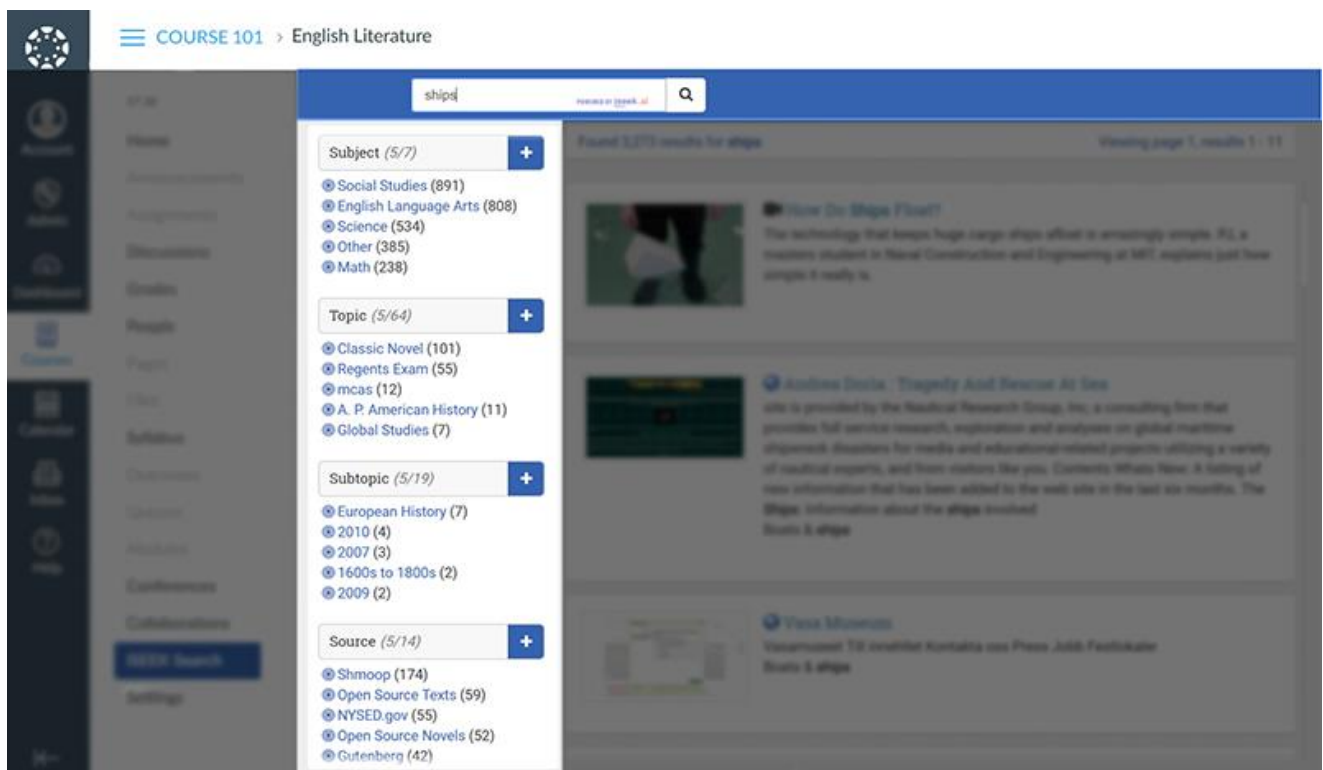

Searches return results categorized by type of media and segmented by grade level...

[Learn More](#)

iseek takes you down to the granular level

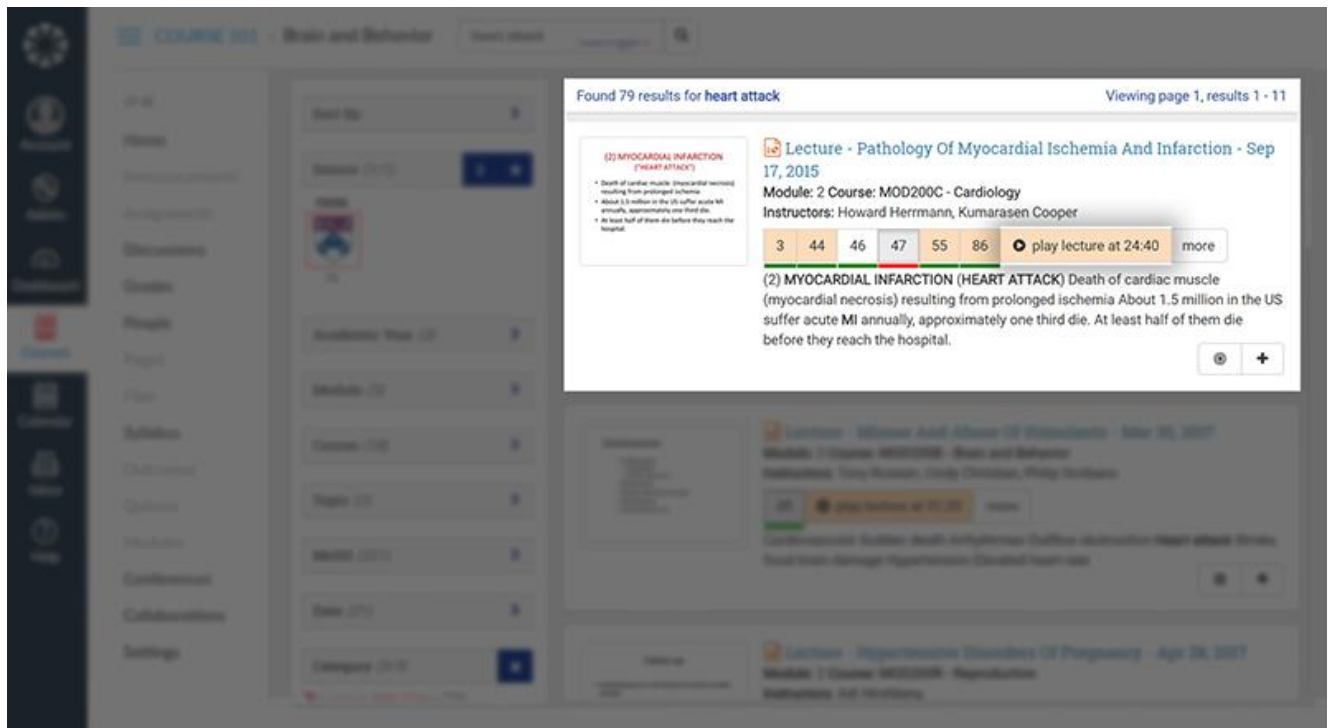

See your result by subject, topic, subtopic, and source.

Learn More

Save time searching for that right piece of content

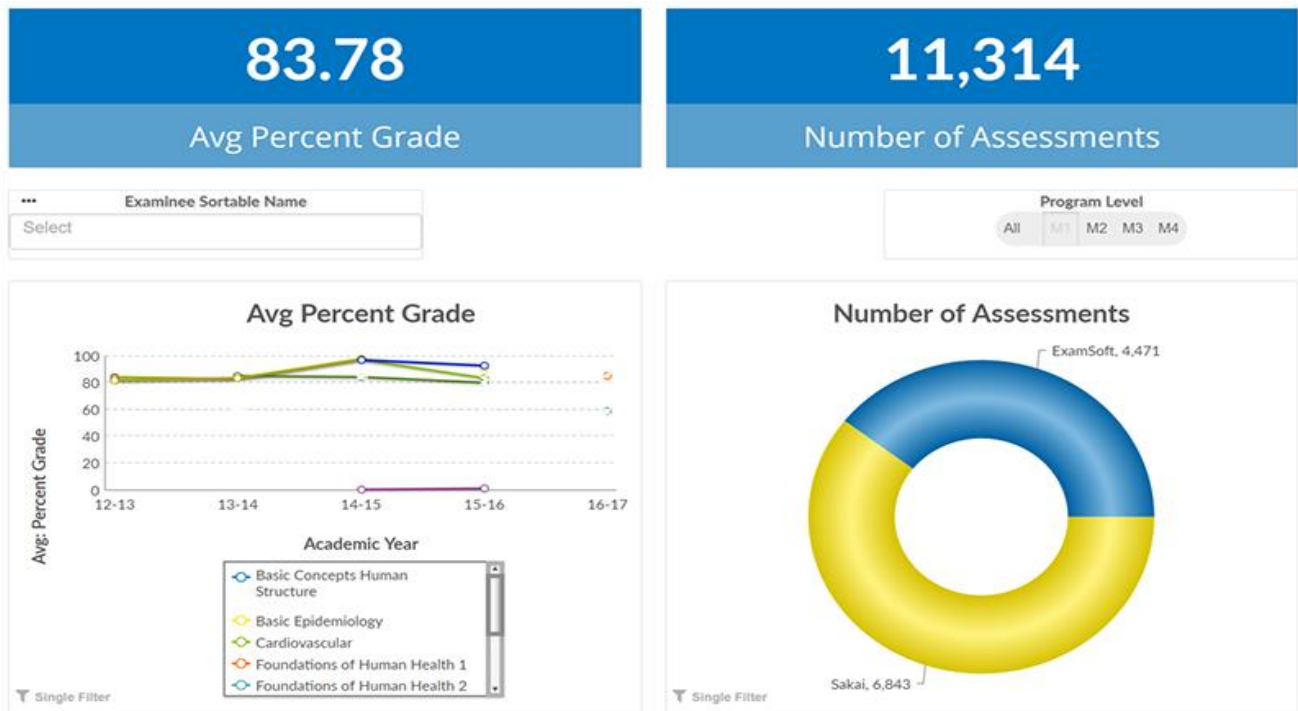

iseek saves students valuable time searching by directing them to the exact slide or video clip of a desired resource.

Learn More

iseek can provide you visibility

iseek can help you determine if your students are proficient in all objectives/competencies.

Learn More

iseek Can....

iseek automatically interprets your unstructured data and communicates it back in a structured format.
